

Senior Engineer / Lead/ Senior Lead - (React+NodeJS)

Chennai, Bangalore, Hyderabad

JOB DESCRIPTION

Job Title: Senior Engineer / Lead / Senior Lead - ReactJS+NodeJS

India Locations: Chennai | Hyderabad | Bangalore

Tiger Analytics is a global leader in AI and analytics, helping Fortune 1000 companies solve their toughest challenges. We offer full-stack AI and analytics services & solutions to empower businesses to achieve real outcomes and value at scale. We are on a mission to push the boundaries of what AI and analytics can do to help enterprises navigate uncertainty and move forward decisively. Our purpose is to provide certainty to shape a better tomorrow.

Our team of 4000+ technologists and consultants are based in the US, Canada, the UK, India, Singapore and Australia, working closely with clients across CPG, Retail, Insurance, BFS, Manufacturing, Life Sciences, and Healthcare. Many of our team leaders rank in Top 10 and 40 Under 40 lists, exemplifying our dedication to innovation and excellence.

We are a Great Place to Work-Certified™ (2022-24), recognized by analyst firms such as Forrester, Gartner, HFS, Everest, ISG and others. We have been ranked among the 'Best' and 'Fastest Growing' analytics firms lists by Inc., Financial Times, Economic Times and Analytics India Magazine.

We're looking for a talented and motivated React + Node.js Developer to join our dynamic team. If you're passionate about building responsive, scalable web applications and enjoy working in a collaborative, innovative environment, we'd love to hear from you.

Key Responsibilities:

- Develop and maintain user-facing features using React.js
- Build reusable, efficient, and scalable front-end components and libraries
- Design and implement server-side logic using Node.js
- Collaborate with cross-functional teams to define, design, and ship new features
- Optimize applications for maximum speed and scalability
- Write unit and integration tests to ensure code quality
- Integrate third-party APIs and services
- Troubleshoot, debug, and upgrade existing systems
- Stay up-to-date with the latest industry trends and technologies
- Participate in code reviews to ensure best practices and high-quality code
- Contribute to the overall architecture and improvement of our tech stack

Requirements:

- Proven experience as a React.js Developer (3+ years preferred)
- Strong experience with Node.js and Express.js
- Proficiency in JavaScript, HTML5, CSS3, and RESTful API development
- Familiarity with modern front-end build pipelines and tools (e.g., Webpack, Babel, NPM)
- Experience with state management tools like Redux or Context API
- Understanding of version control systems (Git)
- Knowledge of database systems (SQL or NoSQL) and experience with ORM tools (e.g., Sequelize, Mongoose)
- Ability to write clean, modular, and well-documented code
- Strong problem-solving skills and attention to detail
- Excellent communication and teamwork skills
- Experience with cloud platforms (AWS, Azure, etc.) is a plus
- Familiarity with Docker and containerization is a plus
